## SYSTEM INTEGRATION

**Navigation Aeronav International (NAI)** designs and integrates a multiplicity of ATC systems with varying technical complexities. Services typically include equipment supply, system integration and on-site installation.

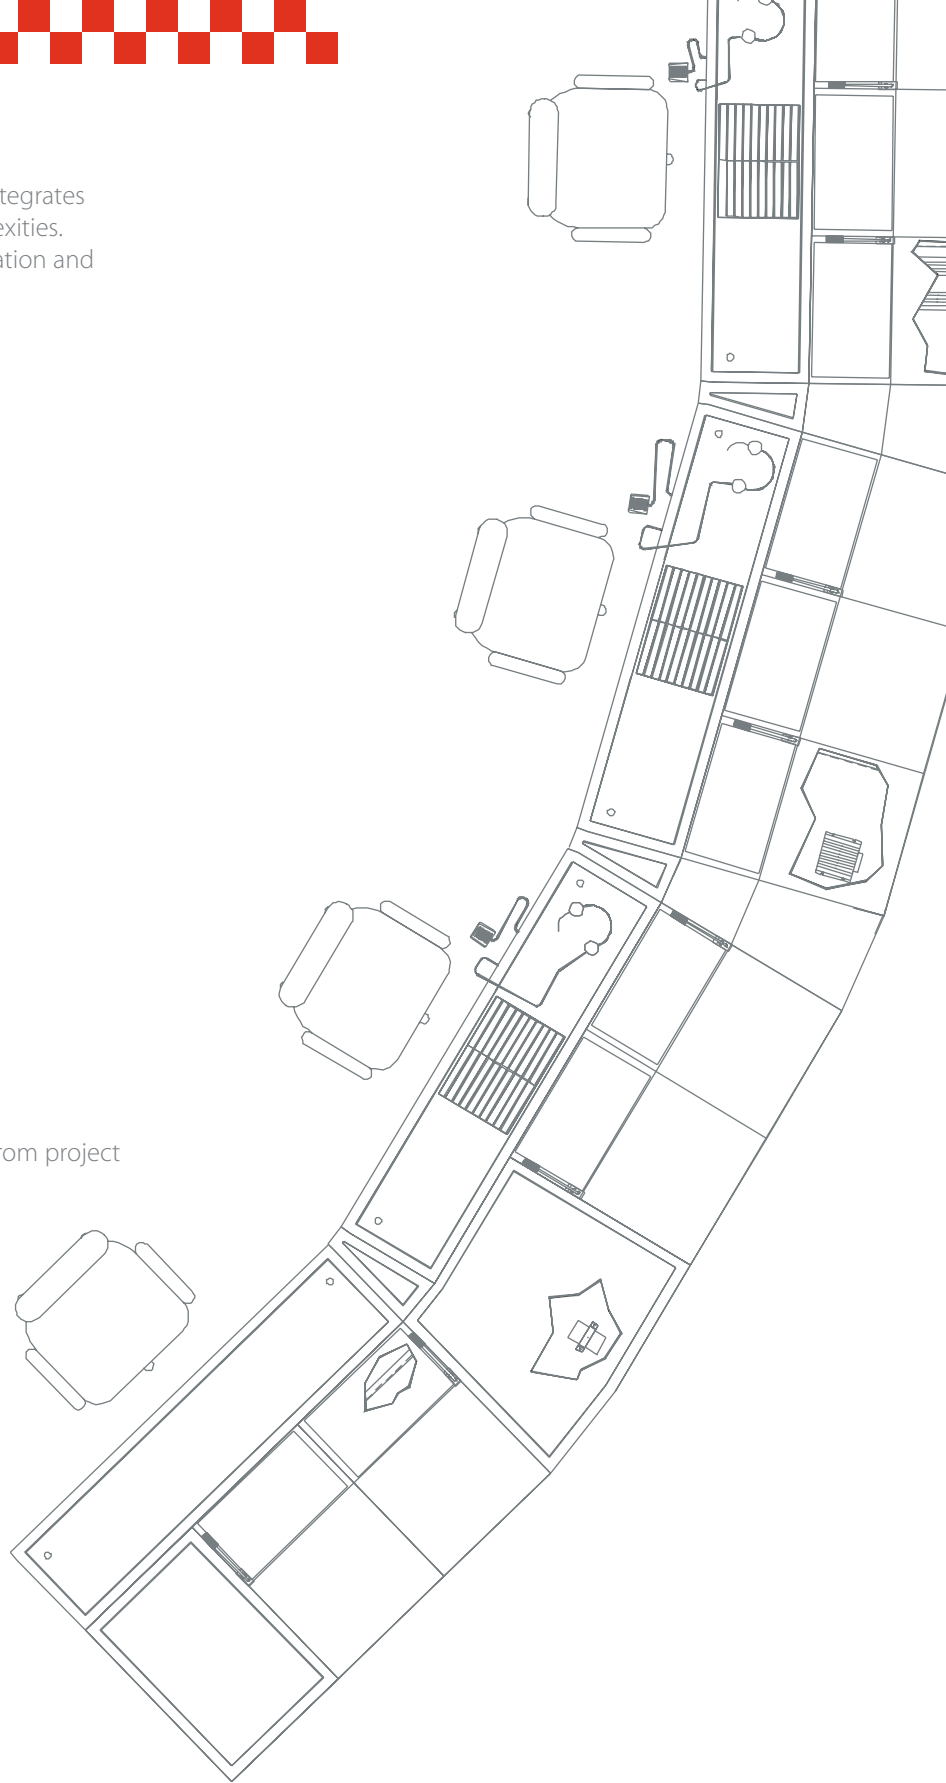

These systems include:

- VHF/UHF/HF radio communications
- Voice communication control system (VCCS)
- Voice communications recorders
- Meteorological equipment
- Time generating systems
- PABX/Intercom/Telephone systems
- Fire brigade hot line
- VSAT networks
- Microwave radio systems/Radar display
- Fiber optic systems
- AFTN systems
- ATIS systems
- Remote control and monitoring systems
- Standby power supplies
- Consoles

## TURN-KEY SERVICES

NAI's engineering services include design-build solutions, from project definition to final commissioning, including:

- Preliminary studies
- Custom design
- Detailed designs
- Installation drawings
- Factory Acceptance Tests (FAT)
- Site Acceptance Tests (SAT)
- Logistics
- Construction, installation and commissioning
- Factory and on-site training
- Operation and maintenance support
- After-sales support
